Experience

Application Development Analyst, Accenture PVT LTD, Bangalore, INDIA

Nov 2015-May 2017

- Detected and handled errors and improved processes in database system (Oracle 10g)
- Managed incidents and problems in ETL process (IBM InfoSphere DataStage)
- Managed live deployment, major releases in the project (QlikView)

Personal Projects

My food - A Shopping List App (Angular5, TypeScript, HTML5, Bootstrap, NoSQL)

- Built a single page application (SPA) using Angular5 and TypeScript that manages recipes and shopping list.
- Added new recipes and edited the added ones. Manipulated both the sections in any way possible
- Learnt important concepts such as modularization of components, lazy loading, AOT and state management using NgRx. Used Firebase. Hosted it in AWS S3.
- <http://kkgd-shopping-list-angular.s3-website-us-east-1.amazonaws.com/>

Krello - A Todo App to manage your responsibilities (Angular5, NodeJS, ExpressJS, MongoDB, MongooseJS)

- Built a fully fledged web app in Angular5 and TypeScript for todo management for any user
- Provided the user with a complete experience todo management where todos can be added, deleted, updated and status of can be changed upon completion
- Got hands-on on different npm modules which are essential to create web apps

Certifications:

- Angular 5 (formerly Angular 2) - The Complete Guide, Udemy, Nov 13 2017
